CRISSCROSS TRAILS: NARRATIVE OF A SOIL SURVEYOR, By Macy H. Lapham. 246 p. Willis E. Berg. 1949

"No one can think of Macy Lapham without thinking of the Soil Survey", Dr. Charles E. Kellogg writes in the Foreword to this book, "nor could one possibly think of the Soil Survey in the West without thinking of Macy Lapham. The West, Macy and the Soil Survey grew up together."

This book is a non-technical account of the organization and development of the Soil Survey. It is also a record of the author's experiences in many interesting nooks and corners of the West, and of the land and its people.

EFFICIENT USE OF FERTILIZERS, By Vladimir Ignatieff. Food and Agriculture Organization. FAO Agr. Studies No. 9 1949 28 F73

A monograph prepared especially for agricultural administrators and advisors who work with farmers and farm organizations. Its purpose is to spread the available knowledge about fertilizers and their use for crop production. The more significant relations of fertilizers to crop rotation, erosion control, irrigation, drainage, and other practices are dealt with briefly.

INSECT ENEMIES OF EASTERN FORESTS. U.S. Dept. of Agriculture Misc. Pub. 657. 1950 1 Ag84M

This is a companion volume to Misc. Pub. 273 "Insect Enemies of Western Forests". "Its purpose is to treat in a practical manner the more important forest insects of that part of the United States lying east of the Great Plains or treeless areas, roughly the 100th meridian. There is necessarily some overlapping of the eastern and western regions, particularly in the more arid parts of Texas and the Southwest and along the water course traversing the Great Plains where the eastern hardwoods extend westward." Introduction

LAND ASSOCIATIONS AND OCCUPANCE PROBLEMS IN THE UINTA COUNTRY, By W. C. Calef. Univ. of Chic. 1948 WFC

The broad objectives of this thesis are: 1. To describe the association of natural qualities which characterizes the Uinta Country as a whole and also its major sections; 2. To appraise the resources of the area that are available for exploitation; 3. To describe and explain the pattern of occupance that has developed in the Uinta Country; 4. To point out the major problem of occupance in the area; 5. To discuss the suggested solutions and to postulate a long range program of change and development.

LOGGING: THE PRINCIPLES AND METHODS OF HARVESTING TIMBER IN THE UNITED STATES AND CANADA, By N. C. Brown 418 p. Wiley c1949 99.76 B81Log

LOGGING (Cont.)

This revision of two earlier books deals with the general problem of suiting logging methods to local conditions of topography, climate, density of timber, volume and size of individual trees. It points out changes in selective logging, in efficiency, wages and availability of labor; in improved mechanical devices, especially tractors, power-driven saws, motor trucks, and the small sawmill. In most cases a description of the method is given, often with illustrations.

WESTERN LAND AND WATER USE, By M. H. Saunderson. 217 p. Univ. of Oklahoma Press 1950 282.003 Sa8

"For years, the West has been looked upon as a land of wide-open spaces and plenty. But with the rapid influx of population during and after the war years, this Promised Land now faces problems at least as serious as those of the congested East - problems of how best to husband its land and water resources in the interest of its own future and the nation's economy...

The Chief concern of any corrective program, asserts Mr. Saunderson, must be the protection of the water reserves - the prevention of a too rapid runoff and the consequent sedimentation of reservoirs. He foresees an increase in the development by the federal government of huge multipurpose projects for hydro-electric power, irrigation, and flood control - projects which can succeed only through programs for federal-state-local co-operation." Publishers' book note

PERIODICAL NOTES

Have you received a revised list of Periodicals Received in Albuquerque Branch Library? This list was distributed with the Jan.-March 1950 issue of the Newsletter. Let us know if you wish to have a copy. Please send in your periodical requests as soon as possible so your name can be added to the routing lists which are now being revised.

Mail periodicals received on routing to the next name on the list. Do not skip addresses. Write the library direct if you think a routing list can be rearrange for more efficient circulation.

If you have changed your address, or if you wish to have your name added or deleted from a routing list, please send a memo directly to the library. Do not note this information on the routing list. Some of the magazines remain in circulation for months - this means your instructions may not reach us for many months.

RANGE RESEARCH HI-LITES issued by the Northern Rocky Mountain Forest & Range Experiment Station is now RESEARCH HI-LITES. The subject scope of the publication has been broadened to include all Station functions - Forest, Range, Fire Control, Economics, Utilization and Flood Control Surveys. Each issue will be devoted to a single subject matter field and will digest results of current research and descriptions of advanced practices.

?DID YOU MISS THESE?

These books are back on our shelves again. They are all informative and readable. Why not select one or more of them for your summer reading? The comments are from our U.S.D.A. readers.

HOW TO RUN A SALES MEETING. Hegarty. 1944 238.2 H36

"The title of this book is somewhat misleading; it is really a treatise on personnel training. And as such it deserves a gold medal. Anyone who is responsible for seeing that someone else gets anything done could read it with profit. The author has admittedly learned what he knows about the mechanics of making training sessions click through much trial and error, and he had the good sense to set down just what he learned through experience, without so much as a bow in the direction of the psychology savants. The book contains more one-syllable words per page than probably any other work on the subject ever published." E.L.Perry -FS

THE ART OF PLAIN TALK. Flesch 1946 200.4 F63

"This book is exceptional and ~~worth~~ careful study."

BUREAUCRACY: A CHALLENGE TO BETTER GOVERNMENT. Juran 1944 249.2 J97

"Amen! Required reading for Bureau of Budget, Fiscal heads. Does every action necessarily and absolutely require a piece of paper along with it?"

"An interesting view of this very real problem."

FOOD OR FAMINE. Shepard 1946 56.7 Sh4F

"Very interesting and educational. The value of the information contained on its leaves should be made available to all farmers."

NEW CROPS FOR THE NEW WORLD. Wilson 1945 31 W69

"The most interesting book received from the Library."

NEW RICHES FROM THE SOIL. McMillen 1946 388 M22

"Good information on things I didn't know were being worked on."

"The information received from reading this book was very beneficial."

THE TRAMPLING HERD. Wellman 1939 135 W46

"Very interesting and readable narrative of the trials and tribulations of the cattle industry."

TWO BILLION ACRE FARM. Howard 1945 30.9 H83

"Reading this book gives one a much better understanding of circumstances and practices which led to present land management in this country. While the author is not entirely without prejudice, the information assembled is pertinent and presented in an interesting manner."

PAY DIRT. Rodale 1946 57.4 R61

"This is one of the most informative books that I have read in regards to the

NEW BULLETINS
